# Ambrosia
Ciszak Dalmas

marset

Ambrosia is essentially a line of light that can be converted into a modular system, capable of extending the illumination it offers to adapt to any space. The new Ambrosia allows you to create vertical lighting compositions, combining different sizes in repetition to illuminate large spaces. Its slender design sets the perfect scene in any room. A totally new perspective for this flexible lighting system, which achieves maximum light expression with a minimalist structure.

Ambrosia V 235
